

Environmental Policy

In-Tec is a commercial cleaning company operating in Brisbane and South-East Queensland. In business for over 30 years, In-Tec provides office and amenities cleaning, periodical cleaning, and supply of hygiene consumables to a range of clients on a 24/7 basis.

Considering its purpose and context, In-Tec recognises the control and influence it has over the environmental impacts of the activities, products and services of itself as well as its customers, and commits to exercising this control and influence in order to protect the environment and prevent pollution.

To achieve these aims, In-Tec has established and implemented an integrated management system (IMS) incorporating the requirements of ISO 14001:2015. In line with IMS requirements, In-Tec commits to the following:

- Controlling its own environmental impacts, and improving its own environmental performance
- Influencing clients to decrease their environmental impacts and improve their environmental performance
- Complying with and satisfying all relevant legislation, compliance obligations and other requirements placed upon In-Tec by statutory and regulatory authorities, customers, standards, itself, and relevant others
- Maintaining and continually improving the IMS in order to enhance environmental performance.

As a method of meeting these commitments, In-Tec documents environmental objectives at relevant functions, levels and processes of the organisation in its Strategies and Objectives Register. Regular monitoring of objectives is completed by top management, and review for achievement is conducted at IMS management reviews.

This policy has been implemented and communicated throughout In-Tec and is made available to workers and interested parties. It is reviewed for continuing suitability, relevance and appropriateness via IMS management reviews.
